

"Helping build better communities"©

Green Building (Residential) Examiner

1 Day 6 hours (0.6 CEU's)

Registration 7:30

Class starts 8:00

Cost 150.00

Classes are limited in size

Approvals ICC, SC, FI

Course Objective: Energy code enforcement is new to many inspectors. This course will help the inspectors understand the Energy Code and some of the trade-offs that can occur. We will also help the field inspector look at a building differently, from an energy stand point.

Method of Evaluation: Thru a series of pre and post progress tests and reviews the instructor will help the student better understand how to interpret the code correctly and avoid common mistakes in the field. A workbook, films, and pictures let the student see how related tables and sections interact, and how to incorporate them into inspections and plan reviews.

Day 1

- *Pre- Quiz and Review*
- *Carbon footprint explained*
- *Plan review and inspection*
- *Site Selection*
- *Building design*
- *Building systems*
- *Resource efficiency*
- *Indo air quality*

There is an online quiz the student can take at no additional cost after the class
